

# [SFTP] Debug Tool To test latest sftp SDK

Last updated by | Xiaoying Zhang | Mar 17, 2022 at 12:59 AM PDT

---

Download link: [SftpTool.zip](#) 

## How to use

This tool will use the latest SFTP SDK to upload the local file to SFTP. Customer need to input all the sftp credentials and file path in the "SftpConnection.json" file.

All the connection properties will be followed the [public document](#) 

LocalFilePath means the local file which will be uploaded to SFTP.

TargetFilePath means the SFTP file path. Note that it should be a file path, not a folder.

After finish the json file, customer can run the "TestSftpConnection.exe".
