## Error Codes

### CRUD / Start / Stop APIs

#### 409

1. Trying to start a running CDC
2. Trying to update a running CDC (publish running CDC)

#### 429

Too many concurrent start calls to a CDC

#### 404

Get CDC which does not exist or is deleted

#### 500

Any other unhandled system exceptions

## UX

**'<cdc-name>' CDC: <source | target> table '<table-name>' schema import failed'**: Emitted when backend API to import schema throws some error while importing source or target schema

**'No columns exist in the source schema. Please try again with a schema-defined source.'**: Emitted when there is user has selected empty folder as source table for any of ADLS sources like 'avro', 'delimited', 'parquet', 'json', 'orc', 'xml'

**'Failed to load <table-name> (<source | target>)'**: Emitted when there is exception occurred while importing schema [not expected to be emitted]

**'Failed to find dataset handler for dataset type: '<dataset-type>''**: Emitted when we are not able to find appropriate handler for a dataset type. [Not expected to be emitted].
