## Issue

HDInsight On-demand cluster failing with the following error:

```
{"ErrorCode":205,"Message":"Failed to prepare cluster for LinkedService 'xxxxxxx', the current resource statu
```

OR

```
{"ErrorCode":202,"Message":"Failed to create on demand HDI cluster. Cluster name or linked service name: 'xxxx
```

## Resolution

In order to resolve this issue, you need to either rename the linked service that they are using or create a new linked service and use the new linked service in their activities.

**NOTE:** The backend team already has a work item to push out a new cluster manager in order to prevent this issue from happening in the future, but the ETA of that fix is sometime in September, 2020.
