

How to monitor or troubleshoot ZA HA?

Last updated by | Hamza Aqel | Jan 10, 2023 at 6:33 AM PST

1. On XTS --> select region
2. Select XTS view "meru19 fspg - ha.xts"
3. Enter servername in search filed and hit "OK" .Currently we can get AZ from CMS query on server entities. It will be added into the XTS view soon.
4. CMS query [XTS CAS command]

```

""Select-SqlazureEnvironment Prod
Select-SqlazureCluster wasd-prod-westus2-a-cr2
