## 202019- Deploy AzureSqlLinkedService hit SSL or Certificate failure

Saturday, February 4, 2017  
11:19 AM

	<b>Issue</b> When deploy an AzureSqlLinkedService in either JsonEditor or CopyWizard, meet error like "The certificate chain was issued by an authority that is not trusted" Or some error related to SSL		<b>CSS Feedback</b> Please leave you feedback if you are using the article to help customers
	<b>Solution</b> Confirm whether customer is using Sql server on Azure VM but not a real Azure Sql. If yes, suggest customer to using OnPremises Sql Server LinkedService instead.  <b>Refer to</b> "The concepts and steps needed for connecting with SQL Server hosted on-premises or in Azure IaaS (Infrastructure-as-a-Service) VMs are the same. In both cases, you need to use Data Management Gateway for connectivity."  <i>From &lt;<a href="https://docs.microsoft.com/en-us/azure/data-factory/data-factory-sqlserver-connector#enabling-connectivity">https://docs.microsoft.com/en-us/azure/data-factory/data-factory-sqlserver-connector#enabling-connectivity</a>&gt;</i>
