## Issue

Using SSMS 17.4, customer was unable to script ANY tables in his Azure MI database, got below error.  
Upgraded to 17.6, issue persists

Invalid version: 15. (Microsoft.SqlServer.Smo)

## Investigation/Analysis

This was the issue a while back with older SSMS installations, suspect there are stall versions of SMO library lingering around.

## Mitigation

Uninstall completely all the versions of SSMS on the machine, then installing the latest one.
