## Issue

When a customer tries to publish Synapse Link for SQL Functionality, publish fails with the below error message

```
("error":{"code":"SynapseLinkStorageResourceNotProvisioned","message":"The Synapse Link storage resource is n
```

The screenshot shows the Azure Synapse Analytics portal interface. At the top, there's a navigation bar with 'Synapse live', 'Validate all', and 'Publish all' buttons. A search bar is also present. Below the navigation bar, there's a sidebar with 'Integrate' and 'Link connection' sections. The main area displays a table mapping source tables to target tables. A warning message is visible in the top right corner, stating: 'Publishing error: The Synapse Link storage resource is not provisioned for workspace workspace1234567890'. The error message is circled in red. The 'Properties' panel on the right shows details for the 'Link connection name' and 'Landing zone settings'.

## Root Cause

This error message indicates that the subscription hasn't whitelisted, or the workspace was created before the whitelist. If it's the latter, the customer should delete and recreate the workspace.

## Resolution

Users must use an Azure Synapse Analytics workspace created on or after May 24, 2022, to get access to Azure Synapse Link for SQL functionality.
