## Contents

- [XTS](#)
- [Kusto](#)
- [Classification](#)

Find failover groups info in the backend:

## XTS

- servers and databases.xts
- databases in failovergroup.xts

## Kusto

```
MonAnalyticsDBSnapshot
| where logical_server_name =~ ''
| where logical_database_name =~ ''
| where failover_group_id <> ''
| summarize by failover_group_id
| join kind=inner ( MonGeoDRFailoverGroups
  | project failover_group_name, failover_group_id ) on failover_group_id
| limit 1
```

## Classification

Root Cause: Azure SQL DB v2\GeoDR/AutoDR
