Issue

Customer getting the following error in Dataflow execution:

1. Data flow expression uses functions/parameters/columns which are not present in current context
2. Column cannot be empty in mapping

Resolution

This error could be because of dataset schema or projection was changed. If customer has made any changes to the schema, then

1. User need to select on the Dataset and click on **Import schema** button
2. If the issue doesn't resolve, click on data flow -> click on the dataset's projection tab and click **Import Projection**

Data Collection

If the issue doesn't resolve, please capture a [browser trace](#) and [Data flow support files](#) for further investigation.
