Issue

CDC not capturing changes. Transaction log usage growing due to this issue.

Investigation/Analysis

Only repl_done being called. No records of execution of repl_cmds - no scan running.

```
MonLogReaderTraces | where TIMESTAMP >= datetime(2021-10-28 00:00:47.4395679) | where TIMESTAMP <=
datetime(2021-10-29 00:35:22.1602720) | where LogicalServerName contains "server name" | where
logical_database_name contains "database_name" | order by originalEventTimestamp asc
```

Mitigation

- Enable capture job, that had been stopped for several days.
- Disable and enable CDC.
