Issue

Customer scheduled pipeline runs with via Scheduled trigger and trigger is not starting the run as expected per schedule.

Workaround

1. Go to ADF UX
2. Click any pipeline
3. Click Trigger(center top area of the screen)
4. Click New/Edit
5. From the Add triggers screen, Select the concerned trigger
6. Rename the trigger in the name field
7. Publish changes
8. If customer wishes , he/she can rename it back to its original name and publish changes
