## Issue

Customer run the GET API call for <https://docs.microsoft.com/en-us/rest/api/sql/2021-02-01-preview/databases/get?tabs=HTTP> , LicenseType is not returned in the result payload.

## Investigation/Analysis

Missing licenseType for Standard SKU database is by design. licenseType is only available on vCore based pricing model databases (General Purpose/Business Critical/Hyperscale)

## Mitigation

Work around for the customers is to only check the licenseType when the service tier is not "Basic", "Standard" or "Premium" using [anyOf/allOf operators in the policy](#) .

## RCA (optional)

## Internal Reference (optional)
