Issue

ErrorCode=MappingColumnNameNotFound,'Type=Microsoft.DataTransfer.Common.Shared.HybridDeliveryException,Message=Column name 'prob_matters_consider' is not found in the source table. Please check the column in 'mappings',Source=Microsoft.DataTransfer.ClientLibrary,';

RCA

Taking the customer source data such as CSV, and we found below format:

```
"CIK","fiscal_year","fiscal_period","big_r_restate","big_r_annouce","prob_matters_consider"
1282631,2017,1,0.00431327057035604,0.002258868411723,0.0383079391600928
1282631,2017,2,0.00659151317842942,0.0126536064613525,0.0079510546317725
1282631,2017,3,0.0124466825269297,0.0294755447394607,0.00930506413608793
```

which means the rowDelimiter of the CSV file attached is \r\n.

While checking the Json file for dataset:

```
"rowDelimiter": "\n",
```

Solution

Please change the dataset configuration matching with the real CSV file.
