Issue

Managed Instance needs permissions to access Azure Active Directory. You need to be a "Company Administrator" or a "Global Administrator" to grant "Read" permissions to the Managed Instance.

Investigation/Analysis

Check if the Managed Instance's Service Principal has Directory Readers permission using ASC:

1. In ASC, navigate to the Managed Instance in Resource Explorer, select Properties page and find

- Identity Principal Id
- Identity Tenant Id

Identity URL

Identity Principal Id

Identity Tenant Id

Billing Start Time

553f6d6fbd73/resourcegroups/GermanDataHub/providers/Microsoft.Credentials/v2/systemassigned?arpid=28aac661-14e2-472c-d402-43e0-8e69-daccf9a48ac8&tid=72f988bf-86f1-41af-91ab-1CDECCD2-6D03-4CBB-BCD4-1F2EFF1B3060
72F988BF-86F1-41AF-91AB-2D7CD011DB47
9/20/2022 11:07:27 AM

2. Open Tenant Explorer (in ASC) and

- Expand *Directory Roles* option and select *Role Assignments*
- Paste the *Identity Principal Id* and select *Run*
- Expand the *Active assignments* and check for Directory Readers.
- Confirm that Tenant Id is the same as the *Principal Organization Id*
