## PostgreSQL Native XML is not supported

Monday, October 2, 2017

4:38 PM

Native XML types is currently not supported.

The CREATE TABLE statement below succeeds:

```
create table test_xml (name character varying(10), iteminfo xml)
```

The INSERT statement below fails:

```
insert into test_xml values ('bob', 'xmlns:xsi=http://www.w3.org/2001/XMLSchema-instance')
```

Here's the error message:

```
ERROR: unsupported XML feature
LINE 1: insert into test_xml values ('bob', 'xmlns:xsi=http://www.w3...
          ^
DETAIL: This functionality requires the server to be built with libxml support.
HINT: You need to rebuild PostgreSQL using --with-libxml.
***** Error *****
```

```
ERROR: unsupported XML feature
SQL state: 0A000
Detail: This functionality requires the server to be built with libxml support.
Hint: You need to rebuild PostgreSQL using --with-libxml.
Character: 37
```

Created with Microsoft OneNote 2016.
