Issue

The customers may encounter an issue when the model.json final name contains special characters.

Error Message

at Source 'source1': java.lang.IllegalArgumentException: java.net.URISyntaxException: Relative path in absolute URI: PPdFTable1.csv@snapshot=2020-10-21T18:00:36.9469086Z.

Recommendation

The workaround is to replace special chars in the file name, which will work in the synapse, not in ADF.
