

Portal error - Database is not available

Last updated by | Subbu Kandhaswamy | Mar 25, 2022 at 12:44 PM PDT

Case 117032915523992

ICM # <https://portal.microsofticm.com/imp/v3/incidents/details/34173371/home>

Symptom

Database state is shown as Unknown in Portal.

Cause

Database has an empty space and the end, so the database name is really "sth_archive ".

Solution should be either:

1. Provisioning trim database name before sending the request.
2. ARM should reject provisioning request with trailing white space

Resolution

The standard mitigation for a trailing space is as follows:

```
ALTER DATABASE [DB ] MODIFY NAME = [DB_]
```

```
ALTER DATABASE [DB_] MODIFY NAME = [DB]
```
