Issue

Customer seeing the following error while running the scope activity job:

```
"executionDetails": [{"source": {"type": "AzureDataLakeStoreCosmosStructuredStream", "region": "West Central US"}, "sink": {"type": "SqlServer"}, "status":  
"Error": {"innerExecutionError": null, "Code": 2200, "Message": "'Type=System.IO.FileNotFoundException,Message=Could not load file or assembly 'Microsof'  
"ExecutionDetails": {"integrationRuntime": [{"name": "SHIRVM", "type": "SelfHosted", "nodes": [{"name": "SHIRNODE"}]}]}
```

Resolution

The issue was because of customer using Self-Hosted IR to copy Structured Stream. We don't support Structured Stream in SHIR.

Workaround is to move Structure Stream to a CSV file in Blob and then copy Blob to On-Prem using SHIR
