Summary

It is not possible to delete a definition if one or more versions still exist under that definition.

Possible causes for issues

If the definition still has versions, this will cause an error.

1. Cannot delete definition

Error

Cannot delete definition

Error that customer sees:

```
ErrorMessage: Gallery application still has gallery application versions. Delete the gallery application ve
StatusCode: 400
ReasonPhrase: Bad Request
```

Mitigation

Delete the application versions in this definition and retry.
