- [1\) What is TWT rerun range feature](#)
- [2\) When will this feature be used?](#)
- [3\) Is this available in GA?](#)

1) What is TWT rerun range feature

Customer could rerun the Tumbling window trigger with the choice of their start and end time, also with a rerun concurrency set

2) When will this feature be used?

When Customer do not want to rerun a single instance of the trigger, but need to run the particular range of time, this feature would be very helpful. For Eg: Customer have a TWT with a frequency of 15 minutes, with this feature Customer can set time range of 10 AM to 10:45 AM and rerun the trigger 3 times (since 15 minutes is the frequency.)

3) Is this available in GA?

This feature is not available in GA yet and can be enabled by PG for specific customers after knowing their subscription
