## Issue

Customer unable to move Data Factory from one Resource Group to another, failing with the following error:

```
{
  "code": "ResourceMoveProviderValidationFailed",
  "message": "Resource move validation failed. Please see details. Diagnostic information: timestamp 'xx'",
  "details": [
    {
      "code": "BadRequest",
      "target": "Microsoft.DataFactory/factories",
      "message": "One of the resources contain integration runtimes that are either SSIS-IRs"
    }
  ]
}
```

## Resolution

Customer needs to delete the SSIS-IR and Shared IRs to allow move operation.

If customer doesn't want to delete the IRs, then the best way is to follow the [copy-clone](#) document to do the copy and after all the [things](#) are done, delete the old factory.
