

Long term backup retention

Last updated by | Hamza Aqel | Jan 10, 2023 at 4:03 AM PST

We don't have currently a mechanism for LTR (Long Term Backup) similar to single server in Azure database for PostgreSQL flexible servers, the customer can:

- 1- Use the pg_dump tool to take a logical backup similar to this [blog](#) .
- 2- The product group is working on LTR feature based on physical backup, ETA is Q2CY23 (under NDA).
