Issue

In SSMS, in case you get an error from mscorlib, **like the following but not limited to**:

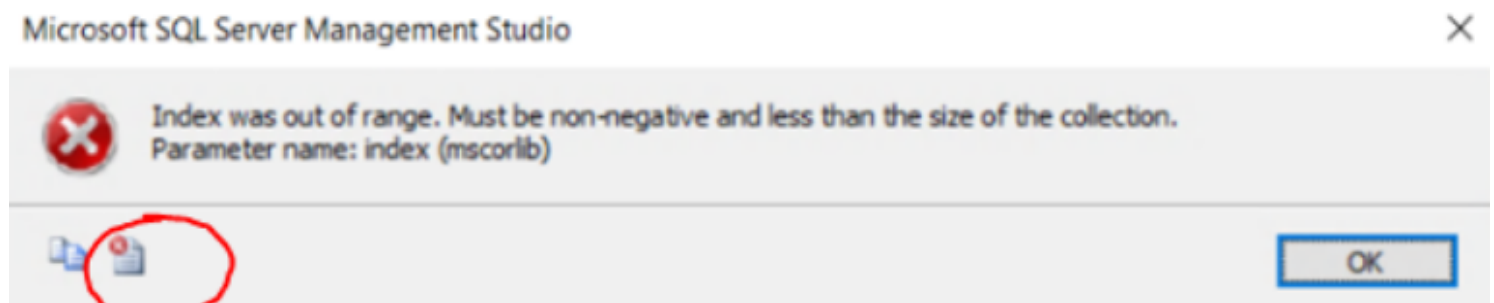

"Index was out of range. Must be non-negative and less than the size of the collection. Parameter name: index (mscorlib)"

Investigation/Analysis

Gather detailed information about the error and raise an incident (IcM).

The detailed error information that can be retrieved by clicking on this button:

Mitigation

Check if the operation that customer is trying to perform can be made/called using T-SQL.

Root Cause Classification

Cases resolved by this TSG should be coded to the following root cause:

Azure SQL DB MI\SQL Client Tools\SSMS\Other
