## Install ODBC Test

<https://www.microsoft.com/en-us/download/details.aspx?id=21995> 

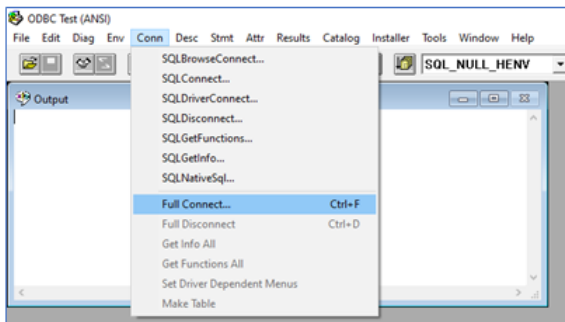

## Use ODBC Test

Use ODBCTest to test connection and run query.

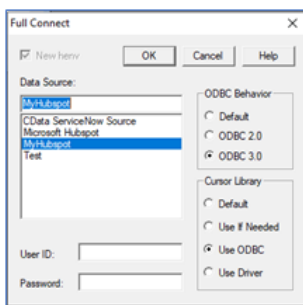

### 1. Run ODBCTest

### 2. Go to "Conn" menu click "Full Connect..." sub-menu.

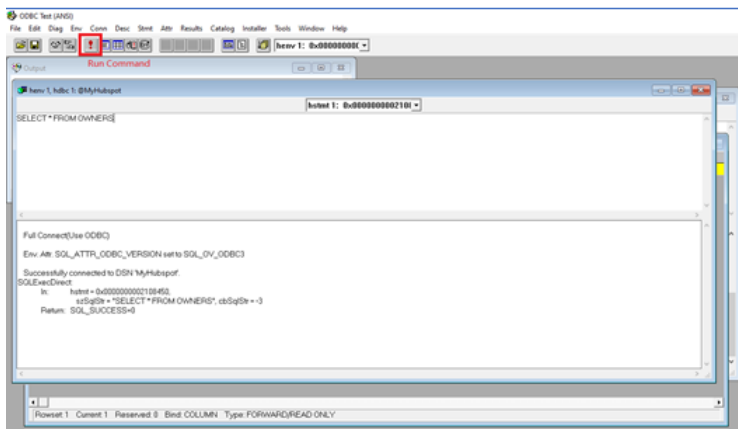

### 3. Choose Data Source Name created in Step3.4, then click "OK" button.

### 4. There is a connection successfully message.

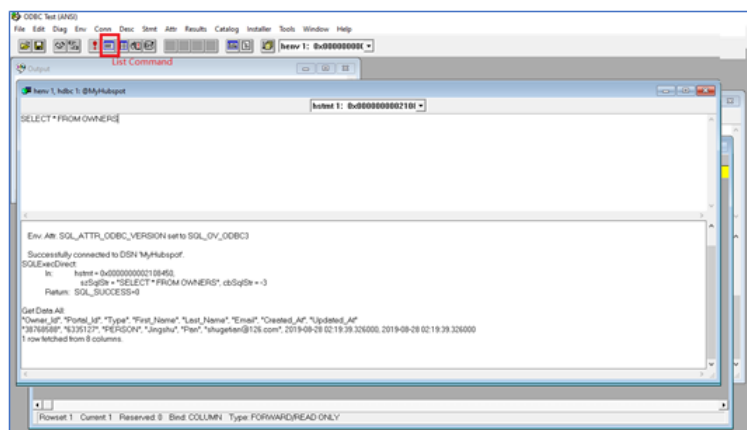

5. Input the SQL query, then click run command button to execute it.

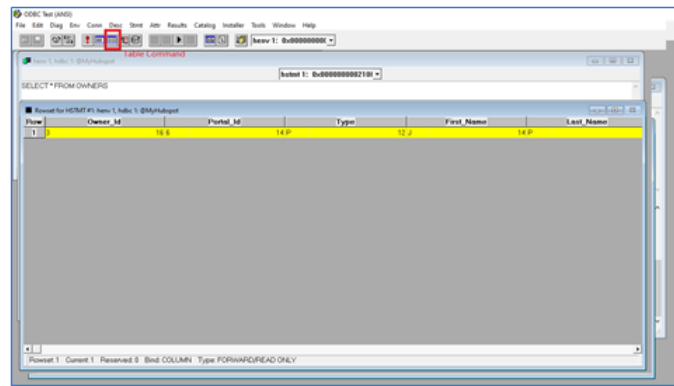

6. This is the dialog after executing queries.

7. Click list command or table command button to get data in data format or table format.

8. Disconnect
