## Public Doc Reference

### Using SqlPackage

<https://docs.microsoft.com/en-us/azure/sql-database/sql-database-import?tabs=azure-powershell#>  using-sqlpackage

### Using the Import Data-tier Application Wizard

<https://docs.microsoft.com/en-us/sql/relational-databases/data-tier-applications/import-a-bacpac-file-to-create-a-new-user-database?view=sql-server-ver15#>  using-the-import-data-tier-application-wizard

## More information

Importing a BACPAC of a database to managed instance using Import/Export Service (New-AzSqlDatabaseExport) is not currently supported.

Use SQL Server Management Studio or SQLPackage instead.
