## Issue

Database state is shown as Unknown in Portal.

## Investigation/Analysis

Database has an empty space and the end, so the database name is really "sth\_archive ". Solution should be either:

1. Provisioning trim database name before sending the request.
2. ARM should reject provisioning request with trailing white space

## Mitigation

The standard mitigation for a trailing space is as follows: ALTER DATABASE [DB ] MODIFY NAME = [DB\_] ALTER DATABASE [DB\_] MODIFY NAME = [DB]
