## Issue

How to check if customer has enabled failover rights on their failover group's geo-secondary.

## Investigation/Analysis

Failover rights (licensing on geo-secondary) information can be found on ASC troubleshooter report --> under GeoDR --> Failover Group. The column 'FreeLicenseGeoSecondary' will tell whether or not failover rights have been enabled on failover group's geo-secondary.

Properties	Availability	Connectivity	Networking	Provisioning	Maintenance	Performance	Read Scale Out	Security	Backup/Restore	Instant Content	ML Services	GeoDR	SQL Agent	Data Virtualization
<a href="#">Failover Group</a>	<a href="#">Broken connectivity failover group</a>	<a href="#">Failover Group internal endpoints</a>	<a href="#">UCS Connections Overview</a>	<a href="#">UCS connection logs</a>	<a href="#">Replication state changes</a>	<a href="#">Seeding overview</a>	<a href="#">Seeding details</a>	<a href="#">Flow control</a>	<a href="#">Synchronization state overview</a>					
<a href="#">Synchronization state changes</a>	<a href="#">Send Queue Size</a>	<a href="#">Send Rate</a>	<a href="#">Send Time</a>	<a href="#">Synchronization metrics overview</a>	<a href="#">Status of continuous copy</a>	<a href="#">Connectivity problems</a>								

  

CreateTime	FailoverGroupId	Name	Server	Role	PartnerServer	PartnerRegion	FailoverPolicy	GracePeriodHours	FreeLicenseGeoSeco...
2022-06-24 05:31:36				Primary		australiacentral2	Automatic	1	No

Alternatively, this kusto will pull the information about the failover groups including failover rights:

```
let serverName = '<miName>';
let startTime = datetime('2022-11-14 16:55:00');
let endTime = datetime('2022-11-15 04:59:37');
MonGeoDRFailoverGroups
| where TIMESTAMP between(startTime..endTime)
| where logical_server_name =~ serverName or partner_server_name =~ serverName
| summarize arg_max(TIMESTAMP, *) by failover_group_id
| project CreateTime = failover_group_create_time, FailoverGroupId = failover_group_id, Name = failover_group_
, Server= logical_server_name, Role=role
, PartnerServer = partner_server_name, PartnerRegion = partner_region
, FailoverPolicy = failover_policy, GracePeriodHours = failover_with_data_loss_grace_period_in_minutes/60
, FreeLicenseGeoSecondary = iff((is_geo_secondary_disaster_recovery_only == 1), 'Yes', 'No')
| order by CreateTime asc
```
