## Issue

CICD deployment failing with the following error:

Cannot bind parameter 'connectionstring'. Cannot convert the 'connection string' value of type "System.String" to type "System.Security.SecureString".

```
✖ Azure Deployment:Create Or Update Resource Group action on PrePassBI-rg-tst-West · 1 error 2 warnings 22s
✖ Cannot bind parameter 'SourceDynamicMSCRM_connectionString'. Cannot convert the "integrated security=True;data source=HLPintSQL201202;initial catalog=HELPInc_MSCRM;User ID=[REDACTED]" value of type "System.String" to type "System.Security.SecureString".
```

## Resolution

User needs to convert the string to secure string as per the error. Try using ConvertTo-SecureString <https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.security/convertto-securestring?view=powershell-7>
