

Overwrite live mode feature does not support deleting resources

Last updated by | Graziani Orcai | Jan 7, 2022 at 3:16 AM PST

Symptom:

Customer used "Overwrite live mode" button and resources that are not in git (collaboration branch) were not deleted from live mode.

Cause:

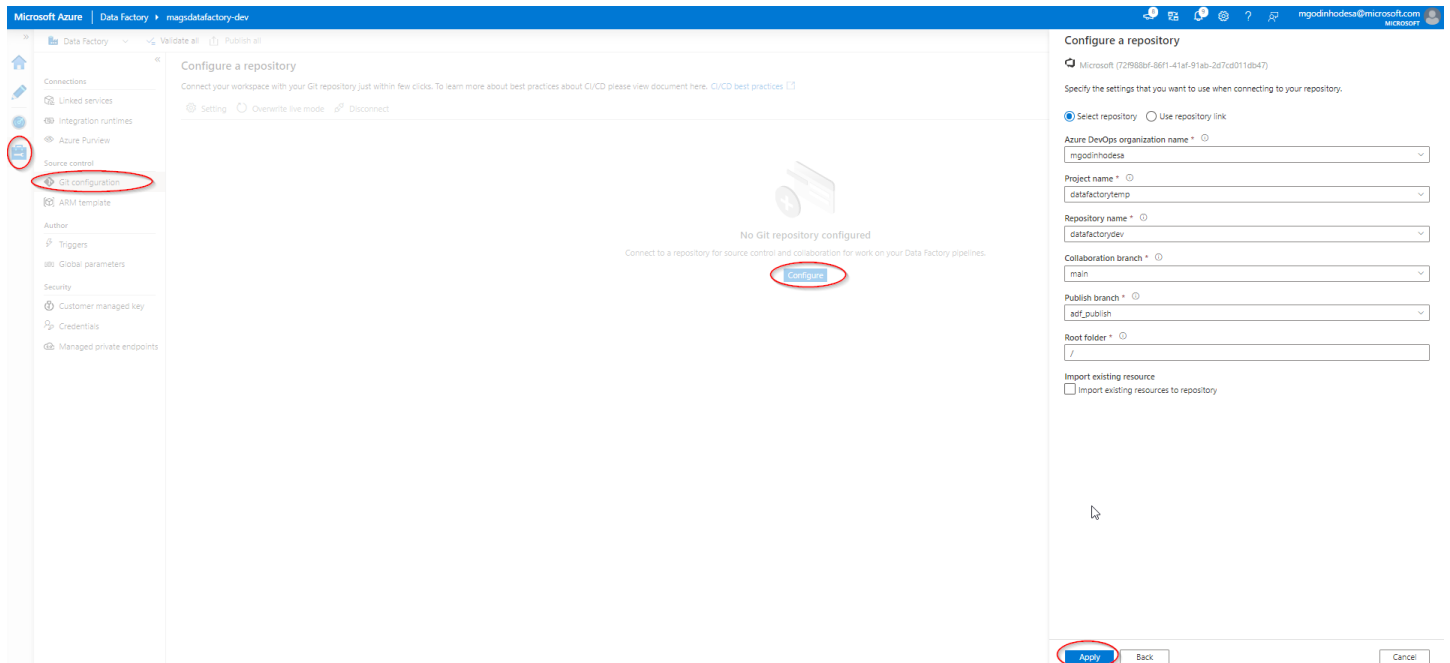

Currently, the "Overwrite live mode" feature does not support deleting resources that are not in git.

There is an open work item to address this: [Product Backlog Item 1547360](#) 

Solution:

While the above work item is in progress, if after using "Overwrite live mode" the customer wants to make sure that live mode reflects exactly what's in Git, the customer needs to:

1. Identify the resources that are in live mode but not in Git.
2. Disconnect ADF from Git.
3. Remove from live mode the resources identified in step 1).
4. Publish.
5. Connect ADF to Git again, like this:

6. Publish.
