

How to resolve connection fail after granting permission in SharePoint Online List

Last updated by | Jingshu Pan | Feb 17, 2022 at 8:31 PM PST

Error code: SharePointOnlineAuthFailed Message: The access token generated failed, status code: %code;, error message: %message;.

Cause: The service principal ID and key might not be set correctly.

Recommendation: Check your registered application (service principal ID) and key to see whether they're set correctly.
