### Jarvis shows no error

**No login failed found**

**Unknown:** The service has not received heartbeats for this resource for more than 5 min."

<https://azure.microsoft.com/en-us/blog/reduce-troubleshooting-time-with-azure-resource-health/>

If the service does not receive signals from a resource for a period of time, the health of the resource will be set to unknown. It is important to notice that this is not a definitive indication
