Issue

Description of the what symptoms the customer may describe when facing the issue/overview of what this TSG covers

Investigation/Analysis

- **SqlError Number: 325**
Incorrect syntax near 'MERGE'. You may need to set the compatibility level of the current database to a higher value to enable this feature. See help for the SET COMPATIBILITY_LEVEL option of ALTER DATABASE.
- **SqlError Number:156**
Incorrect syntax near the keyword 'AS'.

Customer is most likely running on compatibility level 90.

You can confirm this by running [DSS004 - Data Sync Health Checker](#) or

```
SELECT compatibility_level FROM sys.databases WHERE name = DB_NAME();
```

Mitigation

Change into compatibility level 100:

```
ALTER DATABASE myDatabaseName SET COMPATIBILITY_LEVEL = 100
```

Root Cause Classification

Cases resolved by this TSG should be coded to the following root cause:

Root Cause: Azure SQL DB v2\DataSync\User Issue/Error\SetupSyncFail
