Using Mapping to solve columns mismatching in copy activities

Wednesday, February 5, 2020
08:41 PM

Issue:

The schema mapping not respected in copy activities if the schema is defined either in the source or sink datasets

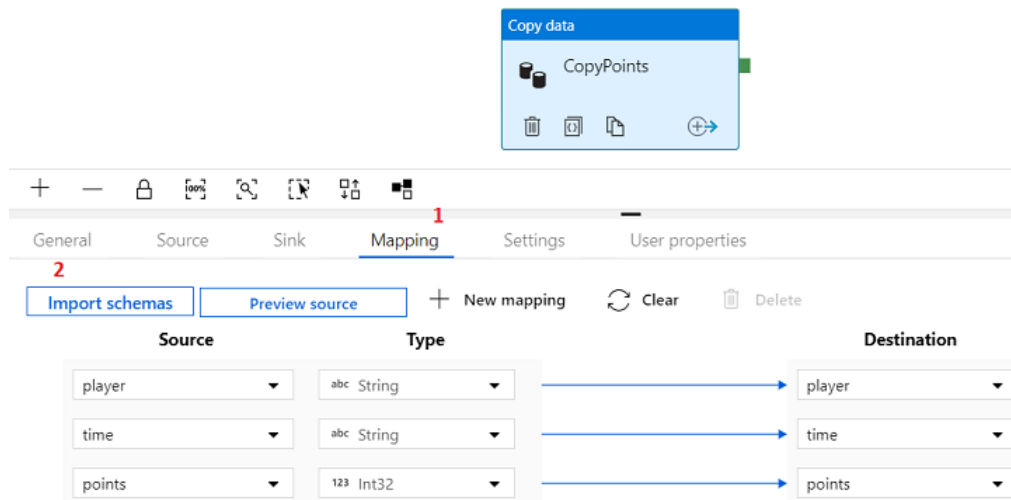

Resolution:

If the schema/structure is defined either for the source or the sink, the user must clear the schema in the source and the sink and define the schema mapping just in the copy activity

1. Clear the schema on the source and sink datasets

- 2) Import the schemas on the copy activity and edit it accordingly
