Issue

Customer got an unhealthy status for VA2129.

Investigation/Analysis

First make sure that you are familiar with the concepts of [ownership chaining](#) and [Module signing](#).

This VA is triggered when a change on the module (stored procedure, trigger, or other) - signing or content, differing from the baseline previously set.

Mitigation

The customer must check if the changes that were made are legitimate or not. If they are legit the customer should add them on the baseline. If they are not, the customer should handle them as appropriate.

Note that all actions and decisions are made by the customer.

Internal reference
