

Troubleshooting video for stuck issue

Last updated by | Supreeth Vasudevamurthy | Jul 27, 2022 at 6:35 PM PDT

[How to investigate a pipeline stuck issue](#) 

```
cluster('adfcus.kusto.windows.net').database('AzureDataFactory').ActivityRuns
| where pipelineRunId =~ "XXXXX"
| extend duration=(end-start)
| project-reorder subscriptionId,dataFactoryName,pipelineName,pipelineRunId,activityName,activityType,activity
| order by TIMESTAMP asc

cluster('azuredmprod.kusto.windows.net').database('AzureDataMovement').ExecutionApiCall
| where ActivityId =~ "XXXXX"
| project-reorder TIMESTAMP, ActivityId,ActivityName,Status,IntegrationRuntime,ErrorDetails,ErrorMessage
| order by TIMESTAMP asc

cluster('azuredmprod.kusto.windows.net').database('AzureDataMovement').CustomLogEvent
| where * == "XXXXX"
| project-reorder Tenant,Role,RoleInstance,Level,TraceComponent,TraceMessage,TIMESTAMP,Message, ActivityId,Job
| order by TIMESTAMP asc

cluster('azuredmprod.kusto.windows.net').database('AzureDataMovement').TaskHostingEvent
| where JobId =~ "XXXXX"
| project-reorder TIMESTAMP,TraceComponent,LogId,Message,Detail,ActivityId,JobId

cluster('adfcus.kusto.windows.net').database('AzureDataFactory').ApiOperationEvent
| where TraceCorrelationId == "XXXXX" or InternalCorrelationId == "XXXXX" //activity runId
| where env_cloud_name startswith "PM"
| project-reorder env_time, env_cloud_name, TraceCorrelationId, ApiName, resultSignature, RequestUri

cluster('adfcus.kusto.windows.net').database('AzureDataFactory').AdfTraceEvent
| where TraceCorrelationId == "XXXXX"
| project-reorder env_time, env_cloud_name, env_cloud_role, env_cloud_deploymentUnit, ComponentId, Message,Tra
| sort by env_time asc
```
