## Issue

When executing Set-AzureAdKerberosServer command to add the Trusted Domain Object, you may get the error:

**Set-AzureADKerberosServer : LsaCreateTrustedDomainEx 0x549**

## Investigation/Analysis

This can happen when running this command on a Child Domain when on a multidomain forest scenario.

## Mitigation

1. Run the command on Root Domain (include -SetupCloudTrust parameter).
2. On Child Domain, run same command without the -SetupCloudTrust parameter.

## Public Doc Reference

<https://techcommunity.microsoft.com/t5/azure-database-support-blog/windows-authentication-for-sql-managed-instance/ba-p/3717025> 

## Root Cause Classification

Cases resolved by this TSG should be coded to the following root cause:  
(TBD)
