

Python Script to monitor ADF Runs

Last updated by | Jackie Huang | Jan 4, 2022 at 12:24 AM PST

Use Case

Sample python script to programmatically monitor ADF runs.

The attached script will get the pipeline run details for the last day.

This can be adjusted as per our requirement (timedelta(days=?)). The time zone is in IST. This can also be modified using the pytz library.

Script Code : [adf_monitoring.txt](#)
