

# Moving Server & Databases to a different subscription(/resource group

Last updated by | Vitor Tomaz | Aug 5, 2020 at 12:43 PM PDT

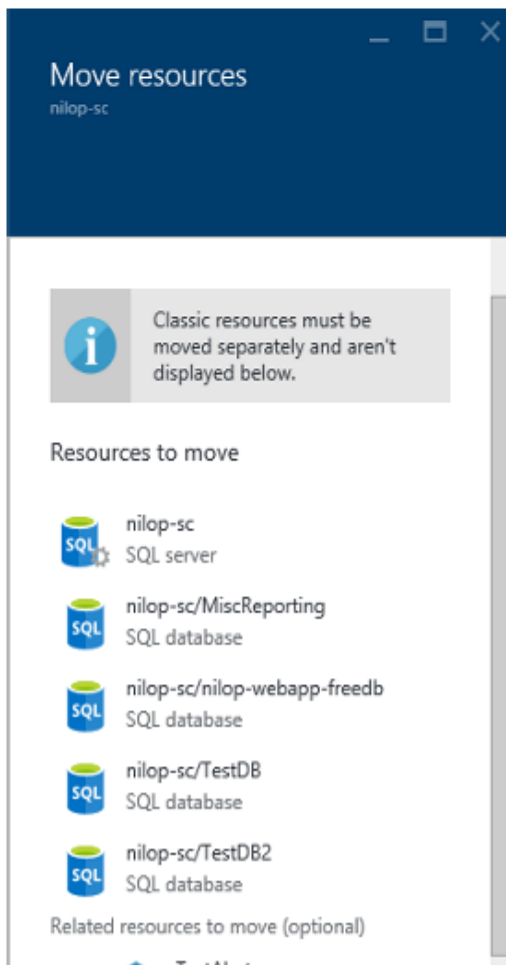

---

- The new portal allows for a server and its resources (as well as other resources to be moved to a different subscription, resource group or both.

- In the portal, go to the respective server blade and you will now see a move option.

- This will open a blade that shows you the databases that will be moved and give you options to move other resources at that time.

Move these resources to

\* Subscription  
Microsoft Azure Internal Consumption (e... ▼

\* Resource group  
▼

[Create a new group](#)

Type 'nilop' to confirm

OK

- Here you can set the options such as the subscription and the resource group.

- Once submitted, you will now have moved the resources to a new subscription.
