Issue

CICD release pipeline failing with the following error:

2020-08-20T14:57:41.9467048Z ##[error]HTTP Status Code: BadRequest

Error Code: BadRequest

Error Message: Missing or invalid pipeline references for trigger **Trigger_daily_01**

Request Id: 3365de8e-64a9-49f8-a196-d79f03902d1a

Timestamp (Utc):08/20/2020 14:57:40

Resolution

This issue happens if the trigger in the error message (Trigger_daily_01) is not mapped to any pipeline.

If you navigate to ADF UI -> Author -> Triggers -> Trigger_daily_01 -> Look at the column "number of pipeline", it should be showing 0.

The triggers needs to be mapped to a pipeline for deployment to succeed, once you do that and re-run the release pipeline it will work fine.
