Scenarios

Failed request

Get the activity id from the error message.

Error details

Error code 11408 

Details

The operation has timed out.

Activity ID: c15d4ac2-d2ea-46c8-8dd5-41b081706c8f

How helpful or unhelpful was this error message?

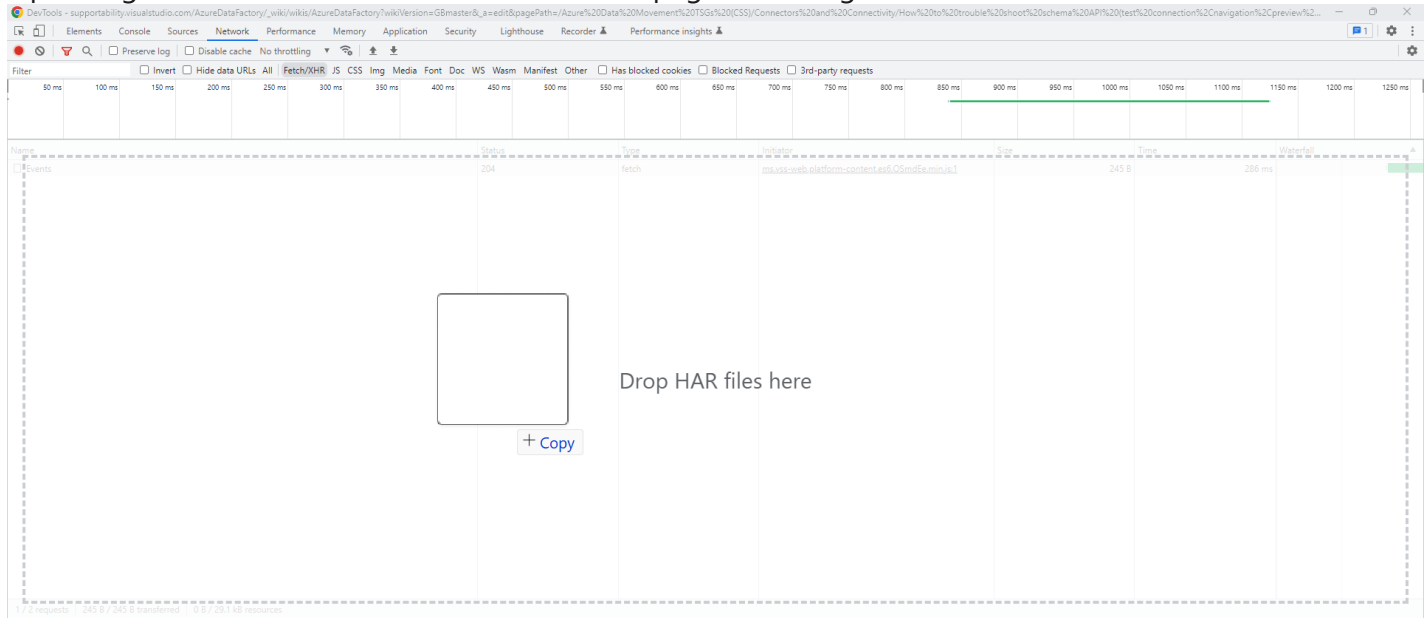

Successful request

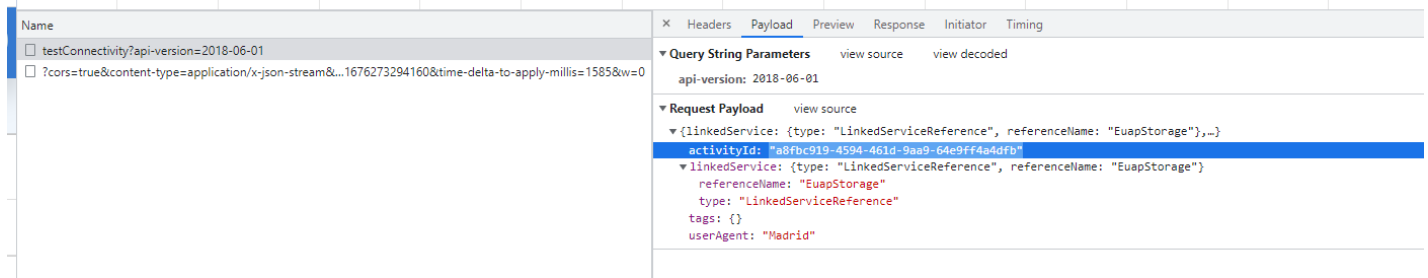

1. Follow the TSG to collect HAR file

[https://supportability.visualstudio.com/AzureDataFactory/_wiki/wikis/AzureDataFactory/290041/Capture-Browser\(HAR\)-Logs](https://supportability.visualstudio.com/AzureDataFactory/_wiki/wikis/AzureDataFactory/290041/Capture-Browser(HAR)-Logs)

2. Open Edge or chrome. Click F12. Select Network page. And drag the har file here.

3. Find the request url and get activity id from the request payload.

Steps to trouble shoot

1. Use below query to get the reset activity id. query_CustomLogEvent(@'7abdaa19-1c0b-4e0b-92ac-d48586e110b6')
2. Find the log with "TraceMessage" as "QueryServiceResetActivityId", get the new activity id. Reset schema API activity id as **0f3c9e15-c25c-4a21-b579-bd6f13271053**
3. Use below query to get the detailed information through the new activity id.
query_CustomLogEvent(@'0f3c9e15-c25c-4a21-b579-bd6f13271053')
