		ASC Onboard	

SME	()
Symptoms	<p>Customer wants to read data from SAP Table, and hit error like this:</p> <p>Dynamic Table Not recognized</p> <p>Kusto Query:</p> <p>CustomLogEvent</p> <p> where ActivityId == <InputActivityId></p> <p> where Message contains 'Dynamic Table not recognized'</p>
Cause	It is because the rfcReadOption parameter set include some conditions that are not supported
Resolution	<p>Here is the solution:</p> <ol style="list-style-type: none">1. Remove the special conditions and retry to preivew to see whether can work.2. If they need to support such kind of condition, use a customRfcForReadTable instead
