## Troubleshooting Performance Issues in Transactional Replication

### [Performance Troubleshooting Initial Steps](#)

*(a short overview to narrow down the initial scope)*

### [Performance: Troubleshooting Log Reader and Distribution Agent Performance](#)

*(detailed steps discussing various scenarios)*

### [Performance: Log Reader and Distribution Agent Statistics](#)

*(explains how you can get performance details from the replication agent history)*

### [Adding XEvents to Monitor Replication Performance](#)

*(steps to monitor replication through Extended Events)*

---

### [Distribution cleanup Performance issues](#)

#### [Log Reader and Distribution Cleanup blocking each other](#)

#### [Distribution cleanup Deadlocks with replication agents](#)

#### [Distribution database growing - msrepl\\_commands table](#)

---

### [Replication Agent is not failing but retrying forever](#)

### [Performance: Distribution Agent improve network performance](#)

### [Performance: Applying Snapshots to the Subscriber](#)

### [Replication Agent time out on first start](#)

### [Snapshot Agent timeout exception](#)
