Servers

Service:
PostgreSQL
API Version:
2017-12-01

Operations

Create	Creates a new server, or will overwrite an existing server.
Delete	Deletes a server.
Get	Gets information about a server.
List	List all the servers in a given subscription.
List By Resource Group	List all the servers in a given resource group.
Restart	Restarts a server.
Update	Updates an existing server. The request body can contain one to many of the properties present in the normal server definition.
