## Max questions limit

Monday, July 3, 2017  
9:06 AM

- **Problem Scope**  
'User 'sadmin' has exceeded the 'max\_questions' resource (current value: 1000)'
- **Cause**  
The default value of max\_question is 0 which means non-limit. I think the 'sadmin' is created by database users.
- **Resolution**  
This value can be set during the user creation or alter after creation. The command is below.  
  

```
CREATE USER 'sadmin'@'%' IDENTIFIED BY '***' WITH MAX_QUERIES_PER_HOUR <value>;  
ALTER USER 'sadmin'@'%' WITH MAX_QUERIES_PER_HOUR <value>;
```

Created with Microsoft OneNote 2016.
