Azure Data Studio An Open Source GUI Editor for PostgreSQL

Wednesday, March 20, 2019
7:24 AM

Azure Data Studio is a cross-platform database tool for data professionals using the Microsoft family of on-premises and cloud data platforms on Windows, MacOS, and Linux.

When you are working with a database, or any other kind of software, your experience is enhanced or hindered by the tools you use to interact with it. PostgreSQL has a command line pretty powerful, but some people much prefer a graphical editor. Even if you typically use command line, you may want to go visual sometimes..... Continue [here](#).

```

1  -- View: pg_catalog.pg_stat_activity
2
3  -- DROP VIEW pg_catalog.pg_stat_activity;
4
5  CREATE OR REPLACE VIEW pg_catalog.pg_stat_activity AS
6  SELECT s.datid,
7         d.datname,
8         s.pid,
9         s.usessysid,
10        u.rolname AS username,
11        s.application_name,
12        s.client_addr,
13        s.client_hostname,
14        s.client_port,
15        s.backend_start,
16        s.xact_start,
17        s.query_start,
18        s.state_change,
19        s.wait_event_type,
20        s.wait_event,
21        s.state,
22        s.backend_xid,
23        s.backend_xmin,
24        s.query
25  FROM pg_database d,
26       pg_stat_get_activity(NULL::integer) s(datid, pid, usessysid, application_name, state, query,
27       pg_authid u
28  WHERE s.datid = d.oid AND s.usessysid = u.oid;
29
30 ALTER TABLE pg_catalog.pg_stat_activity
31 | OWNER TO postgres;
32
