Issue

Web Activity failing with the following error:

From the CustomLogEvent table, we found the following errors:

```
2020-09-29 16:57:45.8918375 WebActivityExecutorExecuteAsync <LogProperties> <Text>ExecuteAsync failed
Error calling the endpoint ". Response status code: ". More details:Exception message: 'Invalid URI: The URI
scheme is not valid.'. No response from the endpoint. Possible causes: network connectivity, DNS failure,
server certificate validation or timeout.</Text> <FunctionName> </FunctionName> <FunctionParameter>
</FunctionParameter> </LogProperties> 3
```

```
2020-09-29 16:57:45.8921476 ExecutionTaskCommon <LogProperties> <Text>Execution failed. Error message:
'Type=Microsoft.DataTransfer.Execution.Core.ExecutionException,Message=Error calling the endpoint ".
Response status code: ". More details:Exception message: 'Invalid URI: The URI scheme is not valid.'. No
response from the endpoint. Possible causes: network connectivity, DNS failure, server certificate validation or
timeout.,Source=Microsoft.DataTransfer.Execution.WebActivityExecutor,StackTrace= at
Microsoft.DataTransfer.Execution.WebActivity.WebActivityExecutor.<ExecuteAsync>d__42.MoveNext(), '</Text>
<FunctionName>ExecutionTask</FunctionName> <FunctionParameter> </FunctionParameter>
</LogProperties> 3
```

```
<LogProperties> <Text>Invoke callback url with req:
{"Status":2,"IsUpdateQueuedStatus":false,"Output":null,"Error":{"ErrorCode":2108,"Message":"Error calling the
endpoint ". Response status code: ". More details:Exception message: 'Invalid URI: The URI scheme is not
valid.'.\r\nNo response from the endpoint. Possible causes: network connectivity, DNS failure, server certificate
validation or timeout.", "Details":null}}</Text> </LogProperties>
```

Resolution

The issue is the web activity URL is not valid as the error suggests.

From the pipeline definition we found that the URL is parametrized to be the output of the previous activity when the activity fails. In this case, most likely previous activity failed and did not provide a URL as the output of the activity, and hence the value provided as the URL was an empty string.
