

CLR (Managed Instance)

Last updated by | Vitor Tomaz | Aug 5, 2020 at 12:42 PM PDT

```
// CLR & Global query
```

```
//
```

```
MonCLRTelemetry
```

```
| where LogicalServerName contains "intercambio-srv" and AppName =~ "b8da6fb2412f"
```

```
| where event contains "on_app_domain_unloading"
```

```
MonGlobalQueryEvents
```

```
| where LogicalServerName =~ "intercambio-srv" and AppName =~ "b8da6fb2412f"
```

```
| where event == "globalquery_appdomain_create"
```

How good have you found this content?
