

[Oracle] Full connection string parameters

Last updated by | Jackie Huang | Jan 4, 2022 at 12:24 AM PST

When handling Oracle tickets, some Progress support engineers require full connection string parameters that ADF passes to the driver. Here are the parameters:

```
arraySize=10240000;bulkBinaryThreshold=-1;cachedCursorLimit=0;connectionRetryCount=3;enableNcharSupport=1;procedureRetResults=1;enableDescribeParam=1;useCurrentSchema=0;enableTimestampwithTimezone=1;timestampTruncationBehavior=1;fetchTSWTZasTimestamp=1;enableBulkLoad=1;columnSizeAsCharacter=1;ignoreOdbcTimestampLiteral=1
```

How good have you found this content?
