	201028- [AzureFileStorage] Region detection for linked services with type 'FileServer' is not supported		<div>ASC OnboardDiagnosticsConnectorIssueByActivityId</div>

Thursday, March 1, 2018  
10:53 AM

Description

AzureFileStorage is not supporting region detection. When it is a sink and using default ManagedIR, copy job will failed by "Region detection for linked services with type 'FileServer' is not supported"

Mitigation

1. Open Madrid portal
2. Click "Create pipeline" -> "Connections" -> "Integration Runtimes"
3. Click "New" button to create a **public network IR**, and select a specific region in "Integration Runtime Setup page"
4. Click "Linked Services" tab
5. Click "New" button to create an Azure File Storage linkedservice and select the new created Cloud IR in "Connect via integration runtime"
6. Then you can either 1) switch to use "Copy Data" and choose "load from existing linked service" to use this new created Azure File Storage Linkedservice to create pipeline or 2) continue to use Madrid UI to create the pipeline.

Created with Microsoft OneNote 2016.
