Issue

Customer wants to create a managed private endpoint to Azure SQL Database. When he tried creating the linked service he is getting error:

Met unknown error when saving the managed private endpoint.

As shown in below screen shot

New managed private endpoint (Azure SQL Database)

i Choose a name for your managed private endpoint. This name cannot be updated later.

Name *

AzureSqlDatabase-prod

Description

Account selection method **i**

☐ From Azure subscription ☒ Enter manually

Resource ID * **i**

/subscriptions//resourceGroups//providers/Microsoft.Sql/servers/

After creation, a private endpoint request will be generated that must get approved by an owner of the data source.

✖ Met unknown error when saving the managed private endpoint.

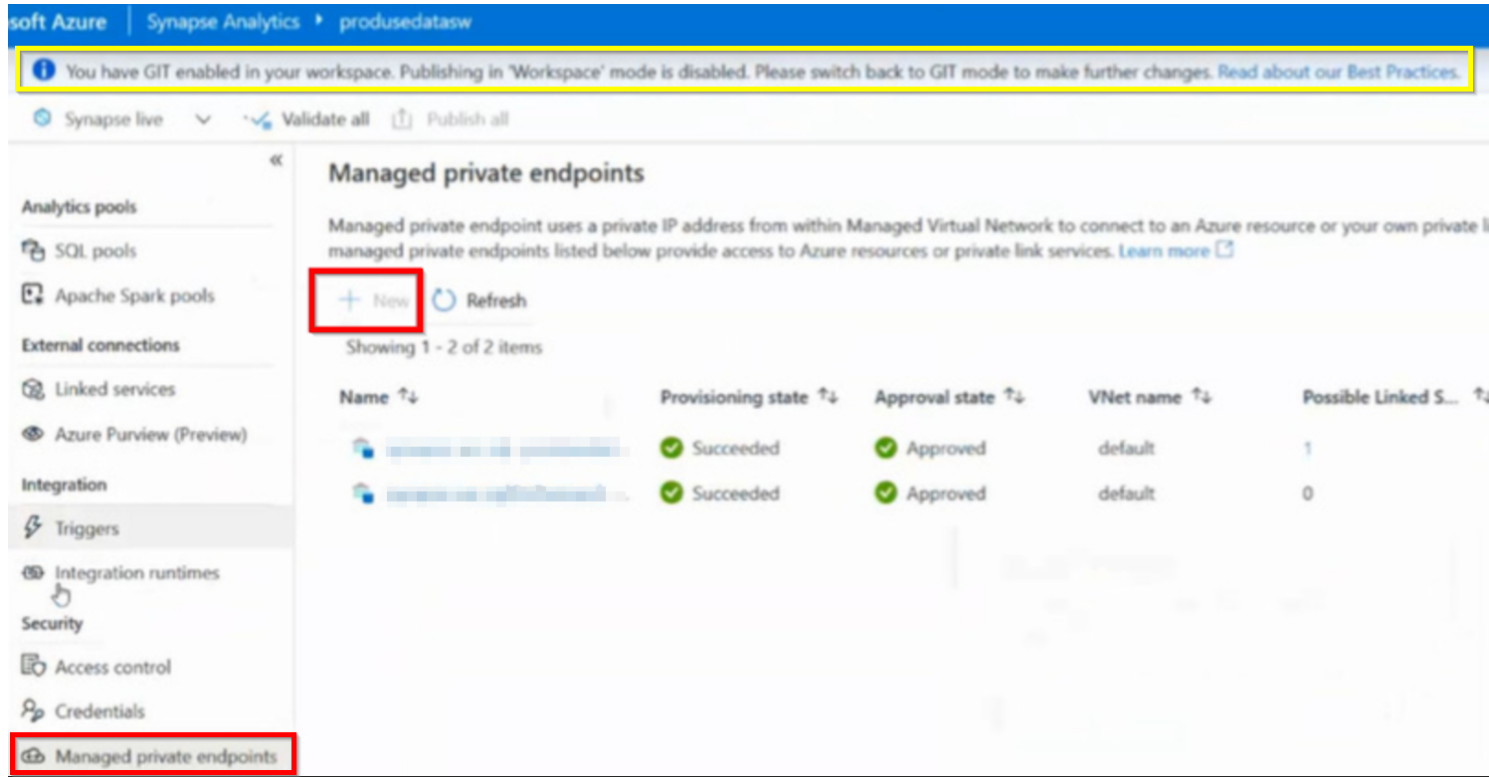

Create

Cancel

Customer wants to know, what's causing this issue and why he cannot create a managed private endpoint to Azure SQL DB.

Resolution

Issue with GIT configuration permission that customer cannot create new managed private endpoint as shown in screenshot

After resolving permission issue, customer is able to see the '+New' option available, and has no issues creating the managed private endpoint.
